PROFESSIONAL SUMMARY

Results-driven Data Analyst with 3+ years of experience in data analysis, reporting, business intelligence, and dashboard development. Skilled in SQL, Python (Pandas, NumPy), Power BI, Excel, and Power Query for data extraction, transformation, validation, and visualization. Strong understanding of ETL, data modeling, data warehousing, KPI reporting, and analytical problem-solving to deliver actionable business insights.

TECHNICAL SKILLS

Programming:	SQL, Python (Pandas, NumPy)
Database:	SQL Server
Business Intelligence:	Power BI, Power Query, DAX, Dashboard Development
SQL Concepts:	Joins, CTEs, Window Functions, Views, Subqueries, Aggregations
Data Engineering:	ETL, Data Extraction, Data Cleaning, Data Transformation, Data Validation
Data Modeling:	Star Schema, Snowflake Schema, Fact & Dimension Tables
Data Warehousing:	OLTP, OLAP
Analytics:	KPI Reporting, Trend Analysis, Root Cause Analysis, Data Visualization
Tools:	Excel, Jupyter Notebook, Git, GitHub

PROFESSIONAL EXPERIENCE

Data Analyst — Tata Consultancy Services (TCS)	May 2022 – Sep 2025
- Extracted, cleaned, transformed, and analyzed large operational datasets using SQL, Excel, Power Query, and Power BI to support business intelligence reporting and operational decision-making. - Developed and maintained 10+ interactive Power BI dashboards and automated reports to monitor KPIs, SLA compliance, ticket trends, backlog analysis, and service performance across multiple business units. - Wrote optimized SQL Server queries using Joins, CTEs, Window Functions, Views, and Aggregations to extract, transform, and validate data from multiple operational sources. - Built ETL workflows using Power Query to perform data extraction, transformation, validation, and loading while reducing manual reporting effort by approximately 30%. - Applied data modeling and data warehousing concepts using Star Schema, Fact & Dimension tables to create scalable datasets for Power BI reporting and analytics. - Produced daily, weekly, and monthly analytical reports, collaborated with cross-functional teams to gather reporting requirements, and delivered actionable insights to improve operational performance.	

PROJECTS

E-Commerce Sales Performance Analytics	SQL, Python, Power BI, Excel
- Processed and transformed 50,000+ sales transactions using SQL and Python to prepare data for business analysis. - Developed interactive Power BI dashboards to track revenue, profit, customer segments, product categories, and monthly sales performance. - Discovered sales trends, customer purchasing patterns, and high-performing products to support inventory and business planning.	
Loan Credit Risk Assessment	SQL, Python, Power BI, Excel
- Cleaned and validated 30,000+ loan application records to improve data quality for credit risk analysis. - Assessed customer creditworthiness using income, employment status, credit history, and loan details to classify risk levels. - Created Power BI dashboards to monitor loan approvals, default rates, customer risk segments, and overall lending performance.	
Healthcare Patient Outcome Analytics	SQL, Power BI, Excel
- Organized and transformed 25,000+ patient records using SQL to support healthcare reporting and performance analysis. - Designed Power BI dashboards to visualize treatment outcomes, readmission rates, hospital utilization, and patient demographics. - Evaluated patient recovery trends and operational KPIs to support healthcare quality improvement initiatives.	

EDUCATION

B.Tech in Mechanical Engineering , Sri Venkateswara College of Engineering and Technology, Srikakulam	2021
CGPA: 7.2/10	
Diploma in Mechanical Engineering , Sri Venkateswara Polytechnic, Srikakulam - 73%	2018
SSC (10th) , Z.P. High School, Srikakulam - CGPA: 7.5/10	2015

CERTIFICATIONS

SQL (Intermediate) — HackerRank	View
Python for Data Science, AI & Development — IBM (Coursera)	View
Power BI Essential Training (2024) — LinkedIn Learning	View

AWARDS & RECOGNITION

Applause Award — Tata Consultancy Services (Apr 2024)
Recognized for outstanding contributions to reporting quality, dashboard development, operational monitoring, and cross-team service support activities.
